Open Government Partnership

Global Summit • Paris • France 2016

DEC 7 - DEC 9
2016

PARIS, FRANCE

PRE PROGRAM
As a forum for sharing good practices, the Open Government Partnership (OGP) provides a unique platform that brings together, stimulates and expands the community of state reformers worldwide.

France will become chair of the OGP steering committee in September 2016. As such, France will host the fourth OGP Global Summit 2016 in Paris from December 7 to December 9.

The OGP summit will involve 3000 representatives from 70 countries: heads of government, ministers, public servants, members of parliament, local authorities, civil society representatives, start-ups and digital innovators, developers, researchers, journalists will gather in Paris to share their experiences and push forward the open government global agenda in light of the future challenges of the planet.

On April 2016, a process of co-construction of the program for the OPG summit was launched, in order to build an agenda directly stimulated by the priorities of the participants. The open call for proposals gathered almost 700 proposals and was enriched by several collaborative workshops.

Transparency and anti-corruption, climate action and sustainable development, digital commons and civic tech, access to information, open parliament, open government at the subnational level, francophonie, implementation of open government...: more than 300 panels, workshops, pitches, will drive the announcement of new commitments, the launch of collective actions and international collaborations, the definition of Partnership priorities for the years to come, the exchange of digital resources and good practices and the presentation of concrete open government cases with a positive transformative impact on citizens’ lives. An OGP Toolbox for Open Government, referencing digital platforms proposed by administrations, civil society organizations and start-ups will be made available in order to foster digital resource sharing and collaboration.

We are pleased to present the OGP Summit provisional program, revealed on September 20 at the OGP’s fifth year anniversary, during the 71st United Nations General Assembly. Over the next few months, the schedule will continue to evolve through contributions and precisions made by session managers, OGP summit organizers and members of the French and international Open Government community.
Monday, dec. 5 and Tuesday, dec. 6
- Civil Society morning
  - Centre Pierre Mendès France de Bercy
- Academic days
- Open Government for Climate Action
- Salle Pleyel
- Opening plenary
- Salle Pleyel
- Reception

Wednesday, dec. 7
- Panels / workshops
- Palais d'Iéna, Palais de Tokyo
- Open Parliament
  - Assemblée Nationale
- Palais d'Iéna

Thursday, dec. 8
- Panels / workshops

- Toolbox Hackathon
- Palais d'Iéna

Friday, dec. 9
- Panels / workshops
  - Toolbox Hackathon
  - Hotel de Ville de Paris
- Closing
- Hôtel de Ville de Paris
- Party
  - Yoyo
MONDAY, DECEMBER 5 AND TUESDAY, DECEMBER 6

ACADEMIC DAYS

On December 5 and 6, Paris 1 Panthéon-Sorbonne Law School and L’Institut du Monde et du Développement pour la Bonne Gouvernance Publique (IMODEV) will host a two days’ roundtable dedicated to academic research focused on open government issues. The purpose is to promote a multidisciplinary approach (Law, Political Sciences, Arts etc.) with researchers from all over the world.

OPEN GOVERNMENT FOR CLIMATE ACTION

The Global Gathering is a civil society event hosted by The Access Initiative to promote thought leadership in the development of impactful open government commitments on climate change.

The Gathering aims to generate a dialogue between climate, open government and open data communities on the facilitation of public access to climate related data, climate finance and how to strengthen movements to address roadblocks in climate accountability related to the implementation of the Paris Agreement. The Gathering is intended to generate innovative ideas on how open climate data and participatory frameworks can drive regional, national and subnational climate action.
WEDNESDAY, DECEMBER 7

CIVIL SOCIETY MORNING

During the morning of December 7, the Pierre Mendes France Center will host a Civil Society event. This session is organized by the French and international civil society with the support of the OGP team. This morning will be the opportunity for the participants to meet before the summit in order to get mobilized and prepare activities and engagements to come.

OPENING PLENARY

The OGP Summit opening plenary will be held on December 7 from 2 p.m. to 6 p.m at the Salle Pleyel. The opening ceremony will be chaired by the president of the French Republic, Mr. François Hollande, who invited the Heads of State from OGP countries and from countries that would like to join the partnership. 2000 people coming from 80 countries are expected to participate to this session.

The plenary session aims to strengthen the mobilization of the OGP member countries and the civil society, to draw up an assessment of the Partnership since its creation in 2011, and to announce the strategic priorities for the next five years.

THURSDAY, DECEMBER 8 AND FRIDAY, DECEMBER 9

OPEN PARLIAMENT

The morning of December 8 will focus on Open Parliament. The French National Assembly will host the Open Parliament international community to work around issues such as civic participation in the legislative co-creation process, parliamentary open data and the implementation of innovative methodologies and formats to promote openness and accountability in the legislative procedure.

DEMOCRACY NIGHT

On Thursday, December 8, from 9 p.m. to 1 a.m., the Democracy Night will spotlight the actors of open government: those who make open government happen will present concrete impact stories through short and dynamic pitches. These pitches will be enriched by dialogues between intellectuals and international experts, who will give perspective and share their views about the future of democracy.
TOOLBOX HACKATHON

The hackathon will start on Thursday night and last 24 hours. The hackathon will be mainly focused on civic techs and the practical implementation of open government commitments. The objective of the hackathon is to launch the Open Government Toolbox at the end of the summit. The Toolbox will reference digital platforms made available by administrations, civil society, and start ups in order to foster resource sharing and collaboration.

SUBNATIONAL SESSIONS

During the afternoon of December 9, the city of Paris will host a series of sessions on the implementation of open government at the subnational level, with the participation of the fifteen OGP local authorities’ pioneers. The purpose will be to discuss local actors' initiatives to improve public management and citizens' participation in local decision-making processes, especially in the environmental field. These sessions will provide an opportunity to deepen the reflection on data issues, in a context of new forms of citizen participation.

VENUES

Salle Pleyel
Palais de l’éna
Palais de Tokyo
Hôtel de Ville
Starting April 2016, proponents from all over the world contributed to the elaboration of the program for the OGP summit, by participating to the open call for proposals. 700 proposals were analyzed by the program committee, composed of government and subnational authorities’ representatives, French and international civil society representatives and members from the OGP support unit.

The program gathers panels and workshops around six main topics:

- Transparency and anti-corruption
- Digital commons
- Climate and sustainable development
- Implementation of open government
- Open government at the subnational level
- Open parliament

Regional approaches will be adopted in order to take into account particular contexts, particularly regarding the European Union and Francophonie.

The selected proposals are listed below. The program will continue to be enriched until November.
TRANSPARENCY AND ANTI-CORRUPTION

ACCESS TO INFORMATION

Panels

- Has OGP encouraged “ATI Lite”?, by Laura Neuman from the Carter Center
- Measuring Transparency, by Helen Darbishire from Access Info Europe
